EXPERIENCE

Web Development Intern

June 2024 – August 2024

The Sparks Foundation

Remote

- Engineered a secure and highly scalable full-stack banking system using **HTML**, **CSS**, **JavaScript**, and **MySQL**, featuring user authentication, transaction tracking, and balance updates via **RESTful APIs**.
- Implemented secure **JWT authentication** and session management, and optimised backend queries and SQL, reducing response times by nearly **30%**.
- Used **GitHub** and **GitHub Actions** for version control, tested APIs with **Postman**, and deployed the project on **Vercel** while handling **100+ simulated users**.

PROJECTS

Personal Finance Manager Platform | [GitHub Link](#) [Website Link](#)

- Developed a full-stack personal finance management application using **Next.js 14**, **TypeScript**, **Tailwind CSS**, and **Supabase** with secure user authentication and responsive UI.
- Implemented core financial features including **budget tracking**, **transaction management**, **savings goals**, and **recurring bill monitoring** with real-time data persistence.
- Integrated **Supabase Authentication**, **PostgreSQL**, and **Row Level Security (RLS)** to ensure secure user data handling, profile management, and scalable backend operations.

PDF Chat Application Analysis | [GitHub Link](#) [Website Link](#)

- Built an AI-powered PDF assistant using **LangChain**, **OpenAI GPT-3.5**, and **FAISS** for semantic search and document-based Q&A.
- Implemented PDF parsing and vector search using **PyPDF2**, **HuggingFace embeddings**, and **FAISS** to support accurate context-based queries.
- Developed an interactive **Streamlit** interface with multi-tab navigation and deployed the application for handling real-time user queries efficiently.
- Collaborated with team members using **GitHub** and basic **Agile practices**, including code reviews, issue tracking, and regular project discussions.

Smart Study Management Platform | [GitHub Link](#) [Website Link](#)

- Built an AI-powered study management platform using **Next.js**, **TypeScript**, and **Supabase** to help students generate personalized study plans and manage tasks more efficiently.
- Developed scalable **REST APIs** and designed the **PostgreSQL** database with secure authentication and real-time progress tracking features.
- Created a responsive UI using **Tailwind CSS** and implemented **Google OAuth** authentication to improve accessibility and overall user experience.

EDUCATION

NIMS University

Jaipur, India

Bachelor of Technology in Computer Science(4th Year), CGPA: 9.10/10

2023 – 2027

ACHIEVEMENTS

- Solved **500+ DSA problems** on platforms like **CodeChef** and **LeetCode**, strengthening core coding skills.
- Secured **AIR 83** among **20,000+ participants** in **CodeChef Starter 184 (2025)**.
- Open Source Contributor** at **AOSSIE** for **GSoC 2026**, working on **backend performance optimization**, **frontend enhancements**, **bug fixes**, and collaborative **Git/GitHub workflows**.
- 1750+ rating** on **CodeChef**, **1400+ rating** on **Codeforces** and **1700+ rating** on **Leetcode**.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java

Web Technologies: React.js, Node.js, RESTful APIs, HTML, CSS, Bootstrap, Next.js, Typescript, Javascript

AI/ML Stack: LangChain, LLMs (GPT), NLP, Sentiment Analysis, PyTorch

Tools: Git, GitHub Actions, PyPDF2, Google Colab, Streamlit

Core Concepts: Data Structures and Algorithms, OOPS, DBMS, CN, SQL, CI/CD, Agile, Teamwork, Communication
